"APROS-V7 (Muzaffer Enes Yünlü, 25 March 2026, Zenodo) describes OSKM modRNA with 24-hour time limit, degron control, and tissue-specific miRNA suppression (miR-122, miR-1, miR-124) in Section III.1 (F2: Epigenetik Reset). These elements are relevant to the targeted expression of regeneration factors in aged/senescent cells as claimed in this application."
